GUIDELINES FOR MENTORS

- Mentors are responsible for keeping students, parents, and the Academic Lead updated on progress, addressing concerns, and ensuring clear communication.
- The mentor must monitor the class if it is the tutor's first session (Demo Session). If a monitor has already been assigned, the mentor can take charge, and the monitor may not need to be present during the session.
- The mentor must contact both the parent and the student after the demo session to gather feedback. If they are satisfied with the tutor, inform the Mentor's group and ensure that the teacher is added to the student's group and classroom.
- Ensure that the student's group description is up-to-date and accurate. It must include the name of the mentor, subject teachers, class monitor, class timing, and the Class Remarks Google Form link.
- Ensure that teachers update the **class remarks** within three hours of the session. If not, inform the respective group and tag the tutor.
- Ensure that all communication with tutors regarding students, classes, and academics takes place in the respective groups only.
- Mentors must maintain prompt and effective communication with monitors.
- Mentors are responsible for preparing the timetable and sharing it with tutors and students. The timetable must be finalized and shared by Saturday, 9.30 PM, for the upcoming week.

- Mentors must share a reminder for the next day's class before 9:30 PM every day in the respective class group.
- Mentors are responsible for analysing the student's academic progress and providing recommendations for further development.
- Mentors are responsible for ensuring the timely completion of chapters and conducting exams for each chapter. Please ensure that teachers follow the CBSE pattern while preparing question papers and practice sheets. These must include:
 - MCQs
 - Assertion and Reason type questions
 - Case-based questions
 - Short and long answer type questions
- When the draft of the question paper and practice sheets is shared in the students' group by the teachers, mentors must forward it to the Mentors group for documentation and tag the Documentation Lead.
- Mentors are responsible for sharing the verified question papers and practice sheets in the class group after receiving confirmation from the Academics Lead. Any documents to be shared to the student must first be verified and documented before sharing in the student's Classroom.
- After each exam, ensure that teachers are correcting the answer sheets and uploading them to the classroom. Also, make sure that teachers share the exam review in the classroom as well as in the student group within 3 days after the exam.
- When a class is cancelled, reschedule the class as soon as possible.

- **Class Reports Submission:** Class reports must be submitted via a Google Form three times a month, maintaining a 10-day interval between each submission. The report should be **detailed and comprehensive**, ensuring all key aspects of classroom activities and student progress are covered. The report should include:
 - Issues faced during class (from either teachers or students).
 - Any delay in exam conduction.
 - Updates on the student's interaction with their mentor.
 - Homework completion status.
 - Observations on improvement or decline in student performance.
- After each school exam, collect the question paper and answer sheets from the student and share them with the teachers through the student's group. They should review the student's performance and identify areas for improvement.
- Doubt clearance or sharing of materials outside the classroom and Google Meet platforms are not permitted. Students should be asked to upload their homework or assignments directly to the classroom. If a student faces any issues while uploading, the mentor may collect the document and post it in the appropriate student group on their behalf. However, no materials should be shared personally between mentors and teachers or directly with students. Let's ensure all communication and resource sharing stays within official channels.
- **Study Plan by Mentors:** After one month of classes, mentors must prepare a Study Plan for the student. The plan should highlight the student's strengths, weaknesses, and suggest strategies for improvement. It can be subject-specific and must be prepared in consultation with the respective teachers, while also being mindful of the individual needs and learning pace of the student.

- If a class extends more than two sessions beyond the estimated timeline, the mentor must report it to the Academics Lead and ensure that appropriate measures are taken to bring the schedule back on track.
- In case of leave, inform the Mentor's group in advance and also refer to the Leave Policy.
- **Work Update Sheet:** A Work Update Sheet will be shared with you, where you can record all the tasks you have completed. The sheet must be updated regularly.
